

TPE's wall-mounted drying rack provides safe and convenient storage for up to 30 test tubes. After tubes have been washed, they are placed on the pegs, drip out their water, air dry, and await reuse.

Made from chemical resistant phenolic resin board with polypropylene pegs, the rack is easy to clean, has no sharp edges, and has an integral drainage basin and outlet. Various sizes available - refer below.

Specifications

External dimension options	600mm wide x 600mm high
	600mm wide x 400mm high
	600mm wide x 300mm high
